

AI REALITY CHECK
A CASE FOR AI?

FOR ONLY
€ 200
NET

ONE FIXED PRICE. ONE HONEST ASSESSMENT.

Do you want to actively use AI in your company? Our experts review your approaches and give honest feedback on the question: Is this a case for AI or is automation sufficient? This way you know exactly whether and where getting started with AI is really worthwhile.

FOCUS

- Are my approaches really a case for AI or is another, simple solution sufficient?
- Which of my ideas has the greatest potential and where is getting started actually worthwhile?
- What is still missing for the concrete implementation?

SCOPE OF SERVICES

1. Assessment: Our experts review up to 10 of your approaches according to uniform criteria. You simply describe your ideas in your own words. No prior knowledge is required.
2. Evaluation – Each idea is rated honestly, including in terms of:
   - Feasibility, benefit & effort
   - Classification: generative AI, machine learning or simple automation without any AI
   - Hurdles: data situation, data protection, EU AI Act
3. Result: A report clearly summarizes our Reality Check.

THE PROCESS IN DETAIL

- Start: short guide on how best to describe your approaches
- Submission: up to 10 ideas easily via online form
- Evaluation: DTS experts assess all ideas with professional expertise
- Final meeting: presentation of results & next steps
- Optional continuation: DTS experts support the implementation, e.g. with a proof of concept for your most promising idea

YOUR BENEFITS

- Cost-effective entry
- Honest answer to the question “A case for AI or not?”:
  - Not every idea needs AI & not every AI idea makes sense or is feasible
  - We show where the greatest potential lies, what is still missing & where another solution is sufficient
- Definition of concrete steps with no open questions
- DTS as a full-stack IT partner for “everything from a single source”, with AI services from our own, German & certified data centers
