DTS AVIATOR

The central platform for managed security services

SEE EVERYTHING. UNDERSTAND EVERYTHING. CONTROL EVERYTHING.

Welcome to the new era of managed security services! DTS Aviator is the first platform in Germany that presents all managed security services in a transparent and comprehensible manner – without tool black boxes, without intransparency, without compromises.

THE PIONEERING SPIRIT OF THE AVIATORS

The aviators were pioneers of aviation: courageous, visionary and responsible. They combined safety with innovation – and it is precisely this pioneering spirit that the Aviator platform brings to your IT security.

We have been inspired by this and want to be different and break new ground. That is why we have deliberately chosen an approach that focuses on what is often missing in the managed services market: trust through genuine transparency. Because true trust is not created by promises, but by visibility. We are confident, clearly stand out from the crowd and prove what we can do through our actions. This is how we make managed services tangible, honest, and unique.
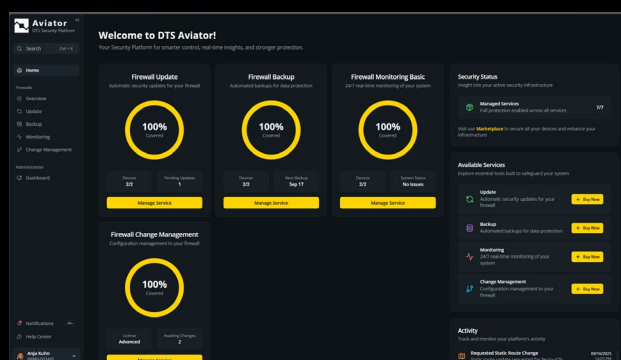

What is special about Aviator? You get immediate Aviator access after booking a service. This is not an add-on, but an integral part of our services – immediately available, immediately visible, immediate trust. Transparency from the start, so you can see exactly what is being delivered and how progress is developing.

With Aviator, you are no longer a passenger, but the pilot of your own security architecture. You know where you stand at all times, what risks are still open and what steps you can take next.

Aviator means orientation, safety and speed with clear vision.

THE DIFFERENCE: DTS AS A TRANSPARENT IT SERVICE PROVIDER

- One platform for all DTS security solutions instead of numerous silo solutions
- Made in Germany: quality, precision, compliance, trust
- All DTS security services combined: centralized, understandable, efficient
- Fast decisions thanks to real-time overview
- 100% visibility and control at the touch of a button
- Current status and booked services at a glance
- Active participation: clear update times, defined rollouts, and much more
- Real-time transparency instead of a black box: see where your services stand at any time, which assets are protected and where there are gaps
- Modular system: combine services as needed
- Important quality feature: DTS makes itself and the service it provides transparent
- Quality assurance through customer focus and data-based service optimization
- Continuous expansion and implementation of transparent services

With DTS Aviator you have all managed security services at a glance

READY FOR TAKE-OFF?

With DTS Aviator, you'll enter a new dimension:

- You don't just control your services – you understand them
- You don't just trust – you see
- You don't just use tools – you have one platform for everything
