

# DTS E-MAIL SECURITY ASSESSMENT

*Are you sure your email security has never been compromised? Most cyberattacks occur via email. Our experts analyze whether email security is ensured in your Microsoft 365 environment. Your opportunity: the DTS Email Security Assessment!*

## AT A GLANCE

- Cost-effective price for the ideal introduction to the question: "Is my email security really comprehensive?"
- Insight into risks surrounding the current email security solution and company data
- Overview of individuals who are regularly targeted within the company
- Presentation of results and evaluation by DTS experts
- In-depth technical support and consideration of the customer's specific context
- Preventive and proactive action
- DTS as an IT security specialist and strong IT partner for "everything from a single source"

## E-MAIL SECURITY ASSESSMENT (M365)

Our security experts will show you what threats you have faced in the area of e-mail over the last two weeks. The assessment reveals malware and ransomware threats, phishing attacks, and fraud attempts in your Microsoft 365 environment, among other things.

## FOCUS

We show you the dangers and thereby increase your risk awareness and understanding. Are you surprised at how big the threat is? We go one step further: our specialists provide in-depth advice and tailor recommendations for action to your individual needs, ensuring the optimal future orientation of your email security. With us, you can be sure of first-class protection for your emails and company data!

## PROCESS

- Kick-off: Process meeting
- Onboarding & project: Discussions, technical process, collection of emails from the last two weeks
- Presentation of results & discussion

## OPTIONS

- DTS experts develop specific recommendations for action & implement them
