

# ECONOMIC INFRASTRUCTURE SCREENING

*Costs too high for a budget that's too small? A screening. An attractive price. Unparalleled quality. Full insight & full understanding. How well is your IT environment adapted to today's challenges? No IT landscape is flawless. Our experts analyze how much potential for cost optimization your IT infrastructure has. Your opportunity: the DTS Economic Infrastructure Screening!*

## AT A GLANCE

- Cost-effective price for the ideal introduction to the question: "How economical is my IT infrastructure?"
- Economic analysis of the relevant applications, infrastructure, and maintenance
- Raising awareness of optimization potential
- Holistic evaluation of the IT landscape based on current cost pressures
- Presentation of results to illustrate business optimization approaches
- In-depth technical support & consideration of customer-specific context
- DTS as an infrastructure specialist & strong IT partner for "everything from a single source"
- Optional additional services, including technical analysis of your IT operating structures

## ECONOMIC INFRASTRUCTURE SCREENING

First, we use a questionnaire and a list of hardware components to determine the current state of your IT infrastructure. In particular, we take into account key applications, infrastructure, maintenance, and the structure of your network. Second, we identify the biggest cost drivers and optimization potential in your IT landscape.

## FOCUS

Despite exhausting your IT budget, to what extent does your organization still have significant deficits in its IT infrastructure? You probably don't know what optimization potential is hidden in your IT landscape. Our analysis not only identifies existing deficits. Our specialists show you how you can convert potential into savings of up to 30%.

## PROCESS

- Kick-off meeting: Virtual meeting to explain the rough process and the questionnaire, as well as to present the cost breakdown template
- Project work: Conducting the economic infrastructure screening, including documentation of the results
- Final meeting: Presentation of the results and joint development of conceptual approaches for cost reduction and more efficient use of capital

## OPTIONS

- DTS experts develop detailed recommendations for action and implement them. In addition, there is the option of a technical review to bring your IT operations up to date and secure them for the future.
- The combination of "Infrastructure Visibility Check" and "Economic Infrastructure Screening" offers a comprehensive analysis of your IT infrastructure.
