

INFRASTRUCTURE VISIBILITY CHECK

Is your IT infrastructure future-proof? One check. One attractive price. Unparalleled quality. Complete insight and understanding. How well is your IT environment positioned for the future? No IT landscape is flawless. Our experts analyze whether your IT infrastructure meets modern requirements, standards, and challenges. Your opportunity: the DTS Infrastructure Visibility Check!

AT A GLANCE

- Cost-effective price for the ideal introduction to the question: "How future-proof is my IT infrastructure?"
- Analysis of key operational issues and the current state of the IT landscape (on-premises and private/public cloud)
- Insight into risks and identification of potentially outdated operational structures
- Holistic assessment of the IT landscape in terms of current challenges and modern standards
- Preventive and proactive action
- Presentation of results to raise awareness of potential technical and business optimization approaches
- In-depth technical support and consideration of the customer-specific context
- DTS as an infrastructure specialist and strong IT partner for "everything from a single source"
- Optional additional services, including business analysis of your IT cost efficiency

INFRASTRUCTURE VISIBILITY CHECK

First, we use a questionnaire to determine the current state of your IT infrastructure, i.e., the basic structure, business-critical applications, and the configuration of your network. Second, we identify the greatest opportunities for optimizing your IT landscape.

FOCUS

How secure is the availability of your critical business data? How well equipped are you when it comes to servers, storage and archiving, workplaces, networks, etc.? You probably don't know what potential has been hidden in your IT landscape until now. We will show you what it is and go one step further: our specialists will also show you how to harness this potential and turn it into clear improvements!

PROCESS

- Kick-off: Preliminary meeting to discuss the general process
- Onboarding: Remote appointment with questionnaire & subsequent evaluation of answers by DTS experts, plus discussion of preparatory measures
- Project: Implementation of the check
- Completion: Summary of findings, presentation of results & discussion

OPTIONS

- DTS experts develop detailed recommendations for action and implement them
- Want to increase the profitability of your IT operations? We examine your IT and IT-related interfaces from a business perspective and increase your cost efficiency!
